Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 – Access Application	Stage 2 – Submit Loan Details	Stage 3 – Receive Prediction
Actions (What does the customer do?)	• Opens the Smart Lender web application. • Reads the project overview. • Clicks the Predict Loan button.	• Enters applicant details such as income, education, employment status, loan amount, credit history, dependents, and property area. • Reviews the entered information. • Clicks the Submit button.	• Waits for the prediction result. • Views whether the loan is approved or rejected. • Uses the prediction to make an informed decision or proceed with the loan application.
Touchpoints (What part of the service do they interact with?)	• Home Page (home.html) • Navigation Button • Web Browser	• Prediction Form (predict.html) • Input Fields • Submit Button	• Flask Backend • Machine Learning Model (.pkl) • Result Page (submit.html)

Phase of Journey	Stage 1 – Access Application	Stage 2 – Submit Loan Details	Stage 3 – Receive Prediction
Customer Thought (What is the customer thinking?)	• "Can this application help me know whether my loan is likely to be approved?" • "Is the application easy to use?" • "Will my information remain secure?"	• "I should enter accurate information." • "I hope the prediction is reliable." • "The process seems simple and quick."	• "I received the prediction instantly." • "The result will help me understand my loan eligibility." • "The system saved my time compared to manual verification."
Customer Feeling (What is the customer feeling?)	• Curious • Interested • Hopeful	• Focused • Confident • Engaged	• Satisfied if approved • Informed if rejected • Trustful towards the prediction system
Process Ownership (Who is in the lead on this?)	• Frontend (HTML/CSS) • Flask Routing • User Interface Module	• Flask Backend • Input Validation Module • Data Processing Module	• Machine Learning Model • Prediction Engine • Result Display Module
Opportunities (How can we improve this stage?)	• Improve UI design. • Add multilingual support. • Enhance accessibility for all users.	• Add input validation and tooltips. • Provide auto-fill suggestions. • Reduce form completion time.	• Display prediction probability. • Provide personalized loan recommendations. • Integrate real-time credit score verification and bank APIs.
