Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] • Individuals applying for personal, education, home, or business loans. • Bank customers seeking quick loan eligibility assessment. • Loan officers and financial analysts. • Banking and financial institutions. • First-time loan applicants requiring guidance.	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] • Limited understanding of loan eligibility criteria. • Lack of financial literacy. • Incomplete or inaccurate application details. • Limited access to banking professionals. • Dependence on manual approval processes.	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Existing Solutions • Manual loan verification by bank officers. • Traditional rule-based approval systems. • Basic online eligibility calculators. Pros • Established banking procedures. • Human expertise in complex cases. • Widely adopted by financial institutions.
---	--	---

		Cons • Slow processing. • High manual effort. • Possibility of human error. • Inconsistent decision-making. • Limited predictive capability.
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] ☐ Loan approval process is slow and time-consuming. ☐ Manual verification increases processing delays. ☐ Applicants are uncertain about their loan eligibility. ☐ Human decision-making may introduce inconsistencies. ☐ Banks receive a large number of applications every day, making manual evaluation difficult.	9. PROBLEM ROOT / CAUSE [RC] ☐ Traditional loan evaluation depends heavily on manual verification. ☐ Multiple applicant attributes make decision-making complex. ☐ Lack of predictive analytics in conventional systems. ☐ Large application volumes increase processing time. ☐ Human bias and inconsistent evaluation affect decision quality.	7. BEHAVIOR + ITS INTENSITY [BE] Behavior • Compare loan eligibility before applying. • Search online for approval requirements. • Submit applications to multiple banks. • Verify credit history and financial status Intensity High , especially during home, education, or business loan applications.
3. TRIGGERS TO ACT [TR] ☐ Need for faster loan approval decisions. ☐ Increasing number of loan applications. ☐ Requirement to reduce manual effort. ☐ Demand for accurate and consistent predictions. ☐ Adoption of AI and Machine Learning in the banking sector.	10. YOUR SOLUTION [SL] The Smart Lender – AI-Based Loan Approval Prediction System uses Machine Learning algorithms to predict loan approval based on applicant information such as income, employment status, education, loan amount, credit history, and property area.	8. CHANNELS OF BEHAVIOR [CH] Online • Smart Lender Web Application • Bank Websites • Mobile Banking Applications • Financial Service Portals
