

Brainstorming & Idea Prioritization Template

Date	15 March 2024
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Bokka Lohith (Team Lead)	Develop an AI-powered system to predict loan approval based on applicant details using machine learning algorithms.	Machine Learning	1
2	Botta Gopinath	Design a responsive web interface where users can enter loan application details and receive instant predictions.	Frontend Development	2
3	Chilakala Nithin Reddy	Perform data preprocessing, handle missing values, encode categorical features, balance the dataset using SMOTE, and train multiple machine learning models.	Data Processing & Model Development	1
4	Muddala Teja Rama Kranthi Kiran Kumar	Integrate the trained machine learning model with a Flask web application for real-time loan approval prediction.	Backend Development	2
5	Sai Kiran Chenuboina	Evaluate multiple machine learning models, compare their performance, select the best model, and deploy the application on IBM Cloud.	Model Evaluation & Deployment	3
6	Entire Team	Build an intelligent, user-friendly Smart Lender application that	Project Vision	3

S.No	Team Member	Idea / Suggestion	Category	Group No.
		automates loan eligibility prediction and assists financial institutions in making faster and more consistent lending decisions.		

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility	Importance	Priority Selected
1	Develop and train multiple machine learning models using data preprocessing, feature engineering, SMOTE, and model evaluation techniques to predict loan approval accurately.	High	High	Yes
2	Develop a Flask-based web application with a responsive user interface for collecting applicant information and displaying prediction results.	High	High	Yes
3	Deploy the Smart Lender application on IBM Cloud with the best-performing machine learning model to provide secure, scalable, and real-time loan prediction services.	Medium	High	Yes
