Empathy Map

SAYS

- I want to know whether my loan is likely to be approved before visiting the bank.
- I need a simple and quick way to check my eligibility.
- I hope the prediction is accurate and trustworthy.
- I don't want to spend days waiting for the approval process.
- I want to understand the factors affecting my loan approval.

THINKS

- Will my income and credit history be sufficient for approval?
- Have I entered all my details correctly?
- Can I trust the prediction provided by the system?
- Is this application secure enough to handle my personal information?
- How can I improve my chances of getting the loan approved?

DOES

- Opens the Smart Lender web application.
- Reads the project overview and navigates to the prediction page.
- Enters applicant details such as income, education, employment status, loan amount, credit history, and property area.
- Submits the loan application details.
- Reviews the prediction result and uses it to make informed financial decisions.

FEELS

- Hopeful about receiving loan approval.
- Curious to know the prediction result.
- Slightly anxious while waiting for the outcome.
- Relieved when the result is displayed instantly.
- Confident in making better financial decisions using the prediction.

Empathy Map Summary

The primary user of the Smart Lender system is a loan applicant seeking a fast and reliable way to assess loan eligibility. The applicant values a simple user interface, quick response time, and accurate predictions. By understanding the user's thoughts, actions, emotions, and expectations, the Smart Lender application delivers a customer-centric solution that reduces uncertainty, minimizes manual effort, and supports informed decision-making during the loan application process.

SAYS • Trustworthy prediction • Wants quick results • Needs easy process	THINKS • Will my loan be approved? • Is my data secure? • Can I improve eligibility?
